I understand that the evaluation, diagnosis and treatment by a naturopathic physician, may include, but are not limited to:

- Interview (history taking)
- Physical examination
- Common diagnostic procedures (such as, diagnostic imaging, laboratory evaluation of blood, urine, stool and saliva, Pap Smears)
- Dietary advice and therapeutic nutrition (such as the therapeutic use of foods, diet plans, nutritional supplements, intravenous and intramuscular injections)
- Botanical medicines and supplements such as the prescribing of various therapeutic substances including plant, mineral and animal materials.
- Over-the-counter medications
- Prescription medications to be filled at a pharmacy or by a compounding pharmacy. As a patient, you have the right and ability to select which pharmacy is used to fill medication orders.

I understand and I am informed that in the practice of Naturopathic Medicine there are risks and benefits with evaluation, diagnosis and treatment including, but not limited to the following:

- **Potential risks:** pain, discomfort, minor bruising from Acupuncture; allergic reaction to prescribed herbs, supplements, prescription medications; an aggravation of pre-existing symptoms.
- **Potential benefits:** restoration of the body's maximal functioning capacity, relief from pain and symptoms of disease, assistance in injury and disease recovery and prevention of disease or its progression.
- **Notice to pregnant women:** all female patients must alert the provider if they know or suspect that they are pregnant, since some of the therapies could present a risk to the pregnancy.
